Schedule Master
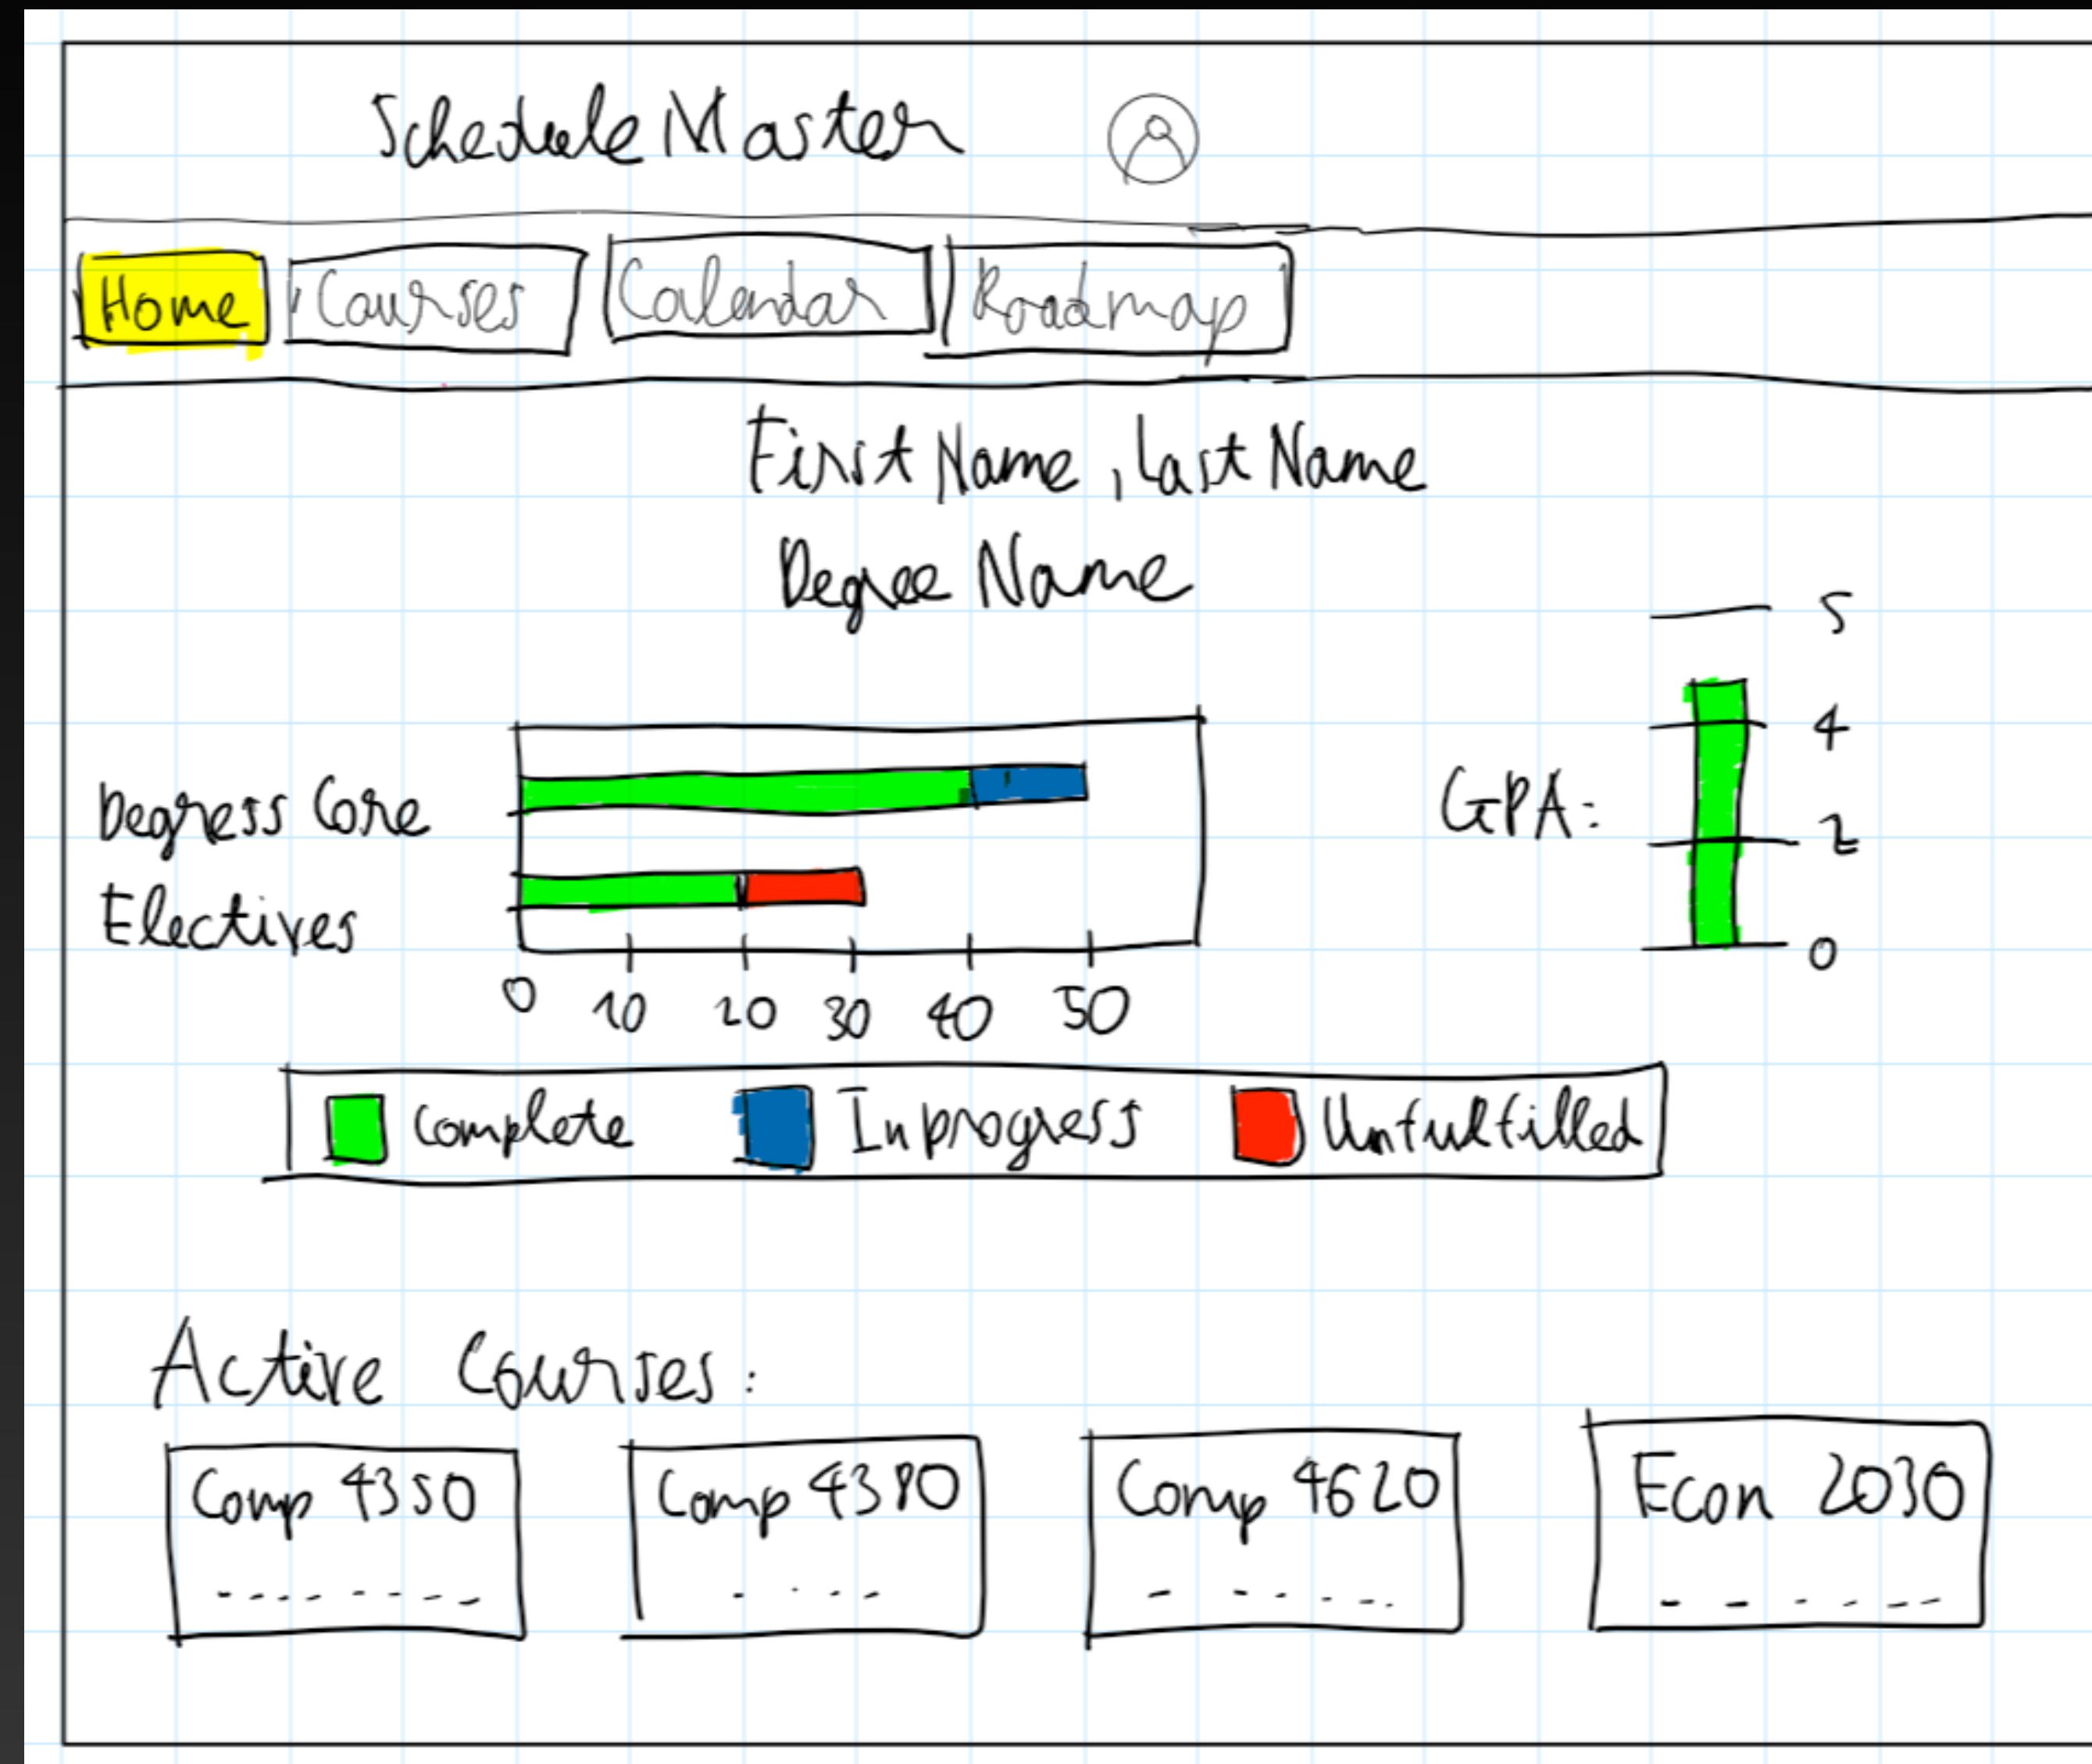

All academic tools you need in once

Team8 - COMP 4350

Project Vision

- A central hub for students to
  - explore and add courses,
  - intuitively visualize schedules,
  - and strategically plan degree path

- Improves the way students manage their academic schedules and plan their degree paths.

Project Summary

- Main components:

  - "View Courses," enabling easy addition of courses to personalized schedules

  - "My Calendar," presenting timetables visually

 - "Roadmap," facilitating strategic degree planning

Core features

- User can manage their registered courses throughout degree and during the term.

- User can view their weekly schedule in a timetable and sync with Google Calendar.

- User can view the roadmap for their degree and create their own customized roadmap.

Technologies

- NodeJS + TypeScript
- Frontend: ReactJS
- Backend: NestJS
- API: Restful
- Database: MySQL
- Docker
- Deployment: Azure (probably)
- CI/CD: GitHub Action
- VCS: Git (GitHub) /w Feature Branch Workflow
- Ticket management: GitHub Project

That's it!
Thank you for listening.
